PROFESSIONAL SUMMARY

- 4+ years of Salesforce development at Fexle Services Private Limited, delivering real estate solutions across design, development and testing.
- Builds with Apex, triggers, batch classes, Lightning Web Components, Aura and Visualforce, including Experience Cloud sites.
- Automates business processes with Flows, Approval Processes and workflow rules, and configures Salesforce CPQ (bundles, product rules, price rules, discount schedules).
- Deploys with the Ant migration tool and Change Sets, and handles production support and bug fixes.
- Holds 5 Salesforce certifications — Agentforce Specialist, AI Associate, Data 360 Consultant, Platform Developer and Platform Foundations — plus the Apex Specialist superbadge.

CORE SKILLS & TECHNOLOGIES

- **Custom Development:** Apex, Apex Triggers, Batch Apex, Test Classes, SOQL/SOSL
- **Frontend:** Lightning Web Components (LWC), Aura, Visualforce, Lightning Design System, JavaScript, HTML, CSS
- **Automation & Flows:** Lightning Flow Builder, Approval Processes, Workflow Rules
- **CPQ:** Products, price books, price rules, quote templates, guided selling, bundles, discount schedules
- **Administration:** Configuration, security model, customization, Experience Cloud
- **DevOps & Tools:** CI/CD, Git/GitHub, Ant migration tool, Change Sets, Workbench, Data Loader

PROFESSIONAL EXPERIENCE

Fexle Services Private Limited

Salesforce Developer | May 2022 – Present

- Contributed to the design, development and testing phases of Salesforce projects.
- Worked with Lightning components, Lightning Web Components and the Lightning Design System.
- Handled Salesforce administration: configuration, security model, customization and maintenance of instances.
- Automated processes with Approval Processes, Flows and workflow rules.
- Designed, built, tested and deployed enhancements to custom objects, page layouts and alerts.
- Built with Apex, triggers, test classes, Visualforce pages and Aura components.
- Deployed with the Ant migration tool and Change Sets; provided production support and bug fixes.
- Configured Salesforce CPQ: products, price books, price rules, quote templates and guided selling. Created custom product rules (selection, validation, alert), product bundles, features, options and constraint rules, and price rules with lookup queries and discount schedules.

KEY ENTERPRISE PROJECTS

VTP (Real Estate)

Role: Salesforce Developer | Team size: 5 | Environment: Apex, Triggers, Batch, Aura, Visualforce, Connected App

- Built Salesforce solutions for a real estate company covering buying, selling, renting and managing properties, from lead generation to closing deals.
- Gathered requirements, discussed approaches with clients and created user-friendly UI and applications.
- Set up automation with Workflow Rules, Process Builders, Flows and Approval Processes; wrote batches, Visualforce pages, Apex classes and triggers.
- Worked with UAT on testing, deployed to production and gave Go-Live support.

Aurobindo (Real Estate)

Role: Salesforce Developer | Team size: 10 | Environment: Apex, Triggers, Batch, Lightning Components

- Delivered solutions for Aurobindo Realty, a developer of residential and commercial projects across several cities in India.
- Built front-end and back-end components: Lightning components, Apex classes, triggers, batch classes and schedulers.
- Provided ongoing support, testing and debugging; reviewed peer code and deployed to the packaging org.

TVS (Real Estate)

Role: Salesforce Developer | Team size: 12 | Environment: Experience Cloud, Apex, Triggers, Batch, Lightning Components

- Delivered solutions for TVS, which develops and manages commercial properties such as office spaces, business parks and IT campuses.
- Built Lightning components, Apex classes, triggers, batch classes, schedulers and Experience Cloud sites, with testing.
- Provided ongoing support and maintenance; reviewed peer code and deployed to the packaging org.

Casagrand (Real Estate)

Role: Salesforce Developer | Team size: 8 | Environment: Experience Cloud, Apex, Triggers, Batch, Lightning Components

- Built front-end and back-end components for commercial property development: Lightning components, Apex classes, triggers, batch classes, schedulers and Experience Cloud, with testing.
- Provided ongoing support and maintenance; reviewed peer code and deployed to the packaging org.
